

Educational Facilities

Fast and efficient building solutions custom designed for your specific requirements for short or long term use.

As leaders in the design and construction of modular, portable and cost effective buildings; Australian Temporary Solutions can help you create additional space or covered areas for your educational facility.

ATS structures are a cost efficient solution, are designed and constructed in extremely short timeframes and can be utilised for a short-term period or purchased for permanent use.

The innovative modular design of the structures enables ATS to create a custom solution specifically for your needs; from additional classroom space, outdoor learning areas through to pool covers.

The core ATS team have completed the required working with children checks enabling them to work on site at daycares, kindergarten, primary and secondary schools.

Benefits:

- Made to order, enabling customers to create a structure that is unique to meet their aesthetic and functional requirements
- Use of standard component parts where possible to achieve cost efficiency without compromise on final product finish
- CAD modelling technology
- Rental and purchase options
- Sustainable construction practices
- Renewable asset
 - Lower costs compared to traditional building options
 - Temporary structures can take as little as 1 day to construct and even less to dismantle
 - Rental or purchase options

Applications:

- Temporary offices & classrooms
- Covered outdoor learning areas
- Recreational facilities
- Sporting structures & pool covers
- Storage
- Rebuild and refurb projects
