

Airports

Efficient and quick construction makes our airport terminal buildings more affordable.

Airports are continuously expanding and need to react quickly to a change in operational requirements. The consolidation of airline routes has put pressure on larger airports to service a higher volume of passengers.

With immediate demand, airports cannot wait for expensive and time consuming traditional construction methods.

Our vast range of structures can easily accommodate your specific airport needs.

Benefits:

- Short production lead-times can always be achieved irrespective of the size of order
- Competitive pricing policy across all product lines
- Relocatable structures for ground support equipment
- Temporary or permanent solutions
- Custom built structures

Applications:

- Hangars and garages for aircraft and helicopters
- Logistics centres
- Storage facilities
- Temporary airport terminals and arrival halls
- Bagging handling areas
- Cargo and warehousing facilities
