

# Warehousing

Warehouse buildings designed to fit your exact site and operational requirements.

Strength and durability are the key features of our warehouse structures. The main framework of our modular buildings are manufactured from a maintenance free, highly durable and robust extruded structural grade aluminum alloy for the main uprights, rafters and roof purlins and corrosive resistant hot

dipped galvanized steel for all connection pieces. Our structures offer unbeatable quality and value for money, when compared with traditional building methods, without compromise on quality or durability

## Benefits:

- Choose from canopies, non-insulated, thermo-insulated or composite steel roofed designed
- Cost effective alternative when compared with traditional construction
- Designed to be installed permanently, yet fully demountable
- 100% prefabricated components enabling accelerated on-site build speeds

## Applications:

- Large span remediation works
- Event solutions
- Aircraft Hangers
- Airports, mobile terminals, surrounding walls
- Military structures
- Emergency Shelters
- Industrial & Construction Shelters
- Machinery Covers
- Retail / Commercial
- Car Parks
- Extensions
- Seasonal Requirements
