- › Singleton Temporary Gym

Singleton Gym

The popular Singleton Gym, jointly operated by the YMCA and Singleton Local Council, sought an alternative venue to provide members with convenient gym facilities throughout the period of renovation and refurbishment of the existing venue.

The Australian Temporary Structures | ATS team utilised the gym's existing carpark to construct a 15m x 20m curved premium structure to create a temporary gym for members.

ATS sourced the bespoke structure from Germany and work commenced only four months from the initial scoping.

The build took only one week to complete with a team of 6 people. Much of this time was spent packing in the floor due to the uneven surface of the existing carpark space.

The structure was pegged and weighted to enable services under the floor and electricity **for mainline power for electrical equipment.**

Temporary Gym Overview:

- Existing carpark (image 1)
- Premium Hocker equipment (image 2)
- Build complete from a team of 6, 1 week (images 3,4,5)
- Floor pegged and weighted for underground services and electricity for equipment, lighting and 3 x airconditioning units (image 6)
- Extra floor ply required to support the weights area (image 7, 8)
